

Performance Management Working Group - SCC
June 16, 2022 - Meeting Notes
1:00pm-2:40pm Remote (Zoom)

- I. TOPIC: Introductions
- II. TOPIC: CoC Updates
 - A. CoC Board Meeting more updates to come
 - B. YHDP - the rank and review panel decided on the applicant that will receive the funding - will be presented to CoC board tomorrow and the 5 agencies will be submitting application project by end of month (10.4 million dollars next 2 year then roll into CoC process -services and shelters for young adults)
 - C. Final PIT count in late July more to share in the next few minutes
- III. TOPIC: Review SCC PM
- IV. TOPIC: Income Measures Discussion
 - A. Living Wage Income Growth (Local) - Housed clients monthly income is greater than or equal to 850/month = 60%**
 - 1. Elisha - keep it the same since we are not meeting it
 - 2. Juan - may not change b/c it is fixed
 - 3. Elisha - How is the data quality on this - could we be missing some data
 - 4. Leila - benchmark was 70% for many years, when was the benchmark set to 70 what was the rationale - would be nice to know
 - 5. Steven - Hunter mentioned that if Vets were included they would be qualified and would be part of this number being higher - assuming data was being entered correctly - basically we should be higher than we are now - there is an error and folks should qualify - needing to identify the error
 - 6. Daniel - How long are we on the hook with this metric
 - 7. Leila - it would be nice to get feedback from people that are PSH
 - 8. BF- to have some conversations with PSH programs to see if this is a good goal**
 - B. RRH - Housed Households monthly income greater than or equal to SCC living wage to exit = 11%**
 - 1. Daniel - comfortable with the 11/6
 - C. RRH - Housed adults monthly income is greater than or equal to SCC living wage at exit = 6%**
- V. TOPIC: Operationalizing Measure
 - A. Other Ideas?

1. Leila - good ideas - if folks see them and know they exist it may inspire them to achieve better data quality that will be compared to a benchmark
2. Elisha - there is always going to be some folks that do not see the bigger picture - data quality trainings are greater always needed - but definitely getting them to understand the importance of data as it related to the PM
3. Leila - Analysis on the households that do meet the living wage and see trends and how they were able to meet them would be practical
